Re: Request to deny mining permit for the Juristac sacred site/ Sargent Quarry Project

June, 2020

Dear Santa Clara County Board of Supervisors
Dear Santa Clara County Planning Commission:

As faculty, staff, students, and affiliates of Santa Clara University, we are writing to express our strongest opposition to the application for a mining permit for the Juristac lands/Sargent Ranch parcel located south of Gilroy.

Juristac is the ancestral and spiritual home of the Amah Mutsun Tribal Band, who have suffered repeatedly through near decimation of their population, cultural persecution, and expulsion from their lands at the hands of European settlers. Mutsun ancestors were forcibly relocated from their homelands to the surrounding missions at San Juan Bautista and Santa Cruz. After the closure of these missions, some of the Mutsun attempted to resettle within their homelands, but were forced to leave a second time to surrounding towns by European settlers. Today, the Mutsun do not own any land at the Juristac site, or any land within their traditional tribal territory, as a direct result of past violations and grave injustices that Native people have suffered. We concur with the Amah Mutsun Tribal Band that the proposed mining operations would irreparably harm Mutsun cultural resources and the spiritual integrity of Juristac. As affiliates of a university that is built on the ancestral lands of the Ohlone people, we acknowledge our institution's historic role in displacing Ohlone culture and actively seek reconciliation with them. The Amah Mutsun Tribal Band are the southern neighbors of the Ohlone groups in whose territory Santa Clara University operates and who were historically associated with Mission Santa Clara. More broadly, we feel a special responsibility to stand in solidarity with the Amah Mutsun Tribal Band as well as the Ohlone community in what is now our common home.

In our Jesuit tradition, we are called to protect the environment as God’s Creation, including its biodiversity and water resources, from irreparable harm. The proposed mining operation, planned as a 320-acre open pit sand and gravel mine, with overburden piles, roads, and processing facilities, represents such irreparable harm. Santa Clara County has a long and successful tradition of protecting open space for the benefit of all people. Part of what makes Santa Clara County such an attractive place for people from all cultures are its open spaces that provide recreational opportunities, but also protect precious and unique species and much-needed ground and surface water. Shorter-term economic gain will in no way compensate for losses of these natural resources. As you are likely well aware, going forward, local ground and surface water resources will become ever more important under mandates for sustainable planning, projected population increases, and expected climate warming.

On January 15, 2020, the city of Morgan Hill unanimously passed a resolution in support of preserving the entirety of the Juristac land as open space, which represents a tremendous opportunity for rethinking the future of Sargent Ranch/Juristac lands in a way that may provide benefit for all people in Santa Clara County. Therefore, **we urge the County of Santa Clara to deny the approval of mining permits for the proposed site, and to support the efforts of the Amah Mutsun Tribal Band to preserve the Juristac/Sargent Ranch lands in perpetuity as a site of significant cultural, spiritual, and ecological significance.**

With best regards,
